

PREFACE

We are pleased to present the newest volume of the Mongolian Geoscientist.

This volume (v.51) contains four original papers presented with distinct authorship from different countries of China, Czech, Japan, and Mongolia. Seven articles that have been submitted to this volume and that four of them are accepted. I would like to thank all authors who have submitted their research results and the editors and invited reviewers who are kindly contributed to the publication of this volume. Published articles are focusing on geology, geochronology, ecology and environmental issues. Our Editorial Board members and external invited reviewers go over these manuscripts. I believe that all papers published in this volume will have a great contribution to the Geoscience research, academic and professional field.

The Journal Managing team is working to improve the journal quality and achievements to fit the Journal Publishing Practices and Standards (JPPS). For instance, since volume 50, we have provided licensed Crossref Similarity Check by iThenticate program to check plagiarism and from this volume 51, we apply ORCID to authorship. Further, we are working to fit the journal volume, issue and page numbering to the JPPS criteria.

The Editors-in-Chief acknowledge the authors, the Editorial Board members, Invited Editors and special thanks for our future readers. We will not be able to exist without you. We are inviting you for collaboration with future new volumes.

Batkhisig Bayaraa
