

# Mongolian Geoscientist

Vol. 30, issue. 61 (2025), pp i  
<https://doi.org/10.5564/mgs.v30i61.5209>

## Editorial

We are pleased to present the latest issue of Mongolian Geoscientist, which comprises five original research articles and two review papers. The contributions cover a wide spectrum of geoscientific disciplines, including geology, petrology, geophysics, geographic information systems (GIS) and remote sensing, geomorphology, and environmental studies.

In recent years, the scope of submissions has expanded considerably, accompanied by a steady increase in both the number and frequency of publications by Mongolian researchers. This growth reflects the journal's strengthening role in disseminating geoscientific knowledge and its increasing recognition within the national and international research communities. The journal continues to enhance its visibility, accessibility, and academic impact through the consistent efforts of its contributors and editorial team.

In 2025, Mongolian Geoscientist achieved significant milestones, including a CiteScore of 1 and a Q3 ranking in Earth and Planetary Sciences, encompassing the subject areas of Economic Geology, Geochemistry and Petrology, and Geophysics. These achievements represent an important step in the journal's development and reflect the collective dedication of authors, reviewers, and editors in maintaining and improving publication quality in line with international standards.

We would also like to express our profound respect and heartfelt gratitude to the late Antonio Alberti, our esteemed colleague and editor. His invaluable contributions to geological science and education, as well as his lasting impact on geoscientific research in Mongolia, are deeply appreciated and will be remembered with great respect.

Finally, we extend our sincere appreciation to all authors for their valuable contributions and to the reviewers for their rigorous and constructive evaluations, which are essential to ensuring the scientific quality and integrity of the journal. We remain committed to further enhancing the journal's quality, scope, and international standing in the field of geosciences.

Editor-in-Chief  
Batkhisig Bayaraa
